# We are PicnixX

Welcome to the world of PicnixX. PicnixX is a high-quality collection of modular picnic tables. The design of the PicnixX tables is unique. Thanks to this design and the superb quality, a PicnixX table is a real experience. Whether you use these tables indoors or outdoors, in a private or business environment: the design is recognizable, timeless and above all: functional.

Thanks to the various configuration options we offer, you can tailor your PicnixX product to your personal wishes. In addition to our standard products, an adjustment or customized project is available for you at your request. The possibilities are nearly unlimited.

All PicnixX products are handmade at our production location in Heeten (NL). We use the best materials and have an eye for every detail. That is what makes the difference. Consequently our products are extremely durable and have a very long life span. We do this as efficiently as possible to achieve the maximum result within your budget.

We hope you are inspired by this brochure and challenge us with your specific requests.

# More than a Table

Thanks to the design and superb quality, a PicnixX table is a real experience. Whether you use these tables indoors or outdoors, in a private or business environment: the design is recognizable, timeless and above all: functional. A good example of this is the integrated sunscreen. The market lacked such a product. This has put us to develop the Sun Shade. As you are used to from us, we have chosen to work again exclusively with the best materials with the highest level of finishing.

# Passionate about Quality

Despite the consumer society we live in, we chose for quality. Instead of the low-cost, environmentally harmful products with a short service life that we see around us, our employees are driven by quality. Time and again we aim to create the maximum achievable quality. Every detail has been thought about. In fact, our protective covers are actually not necessary at all. Even in our climate, Camura wood lasts for 25 years. Since the use of covers maximizes the lifespan even further, we opt for it anyway. Moreover, it looks sophisticated when unused products are covered.

# Cumaru

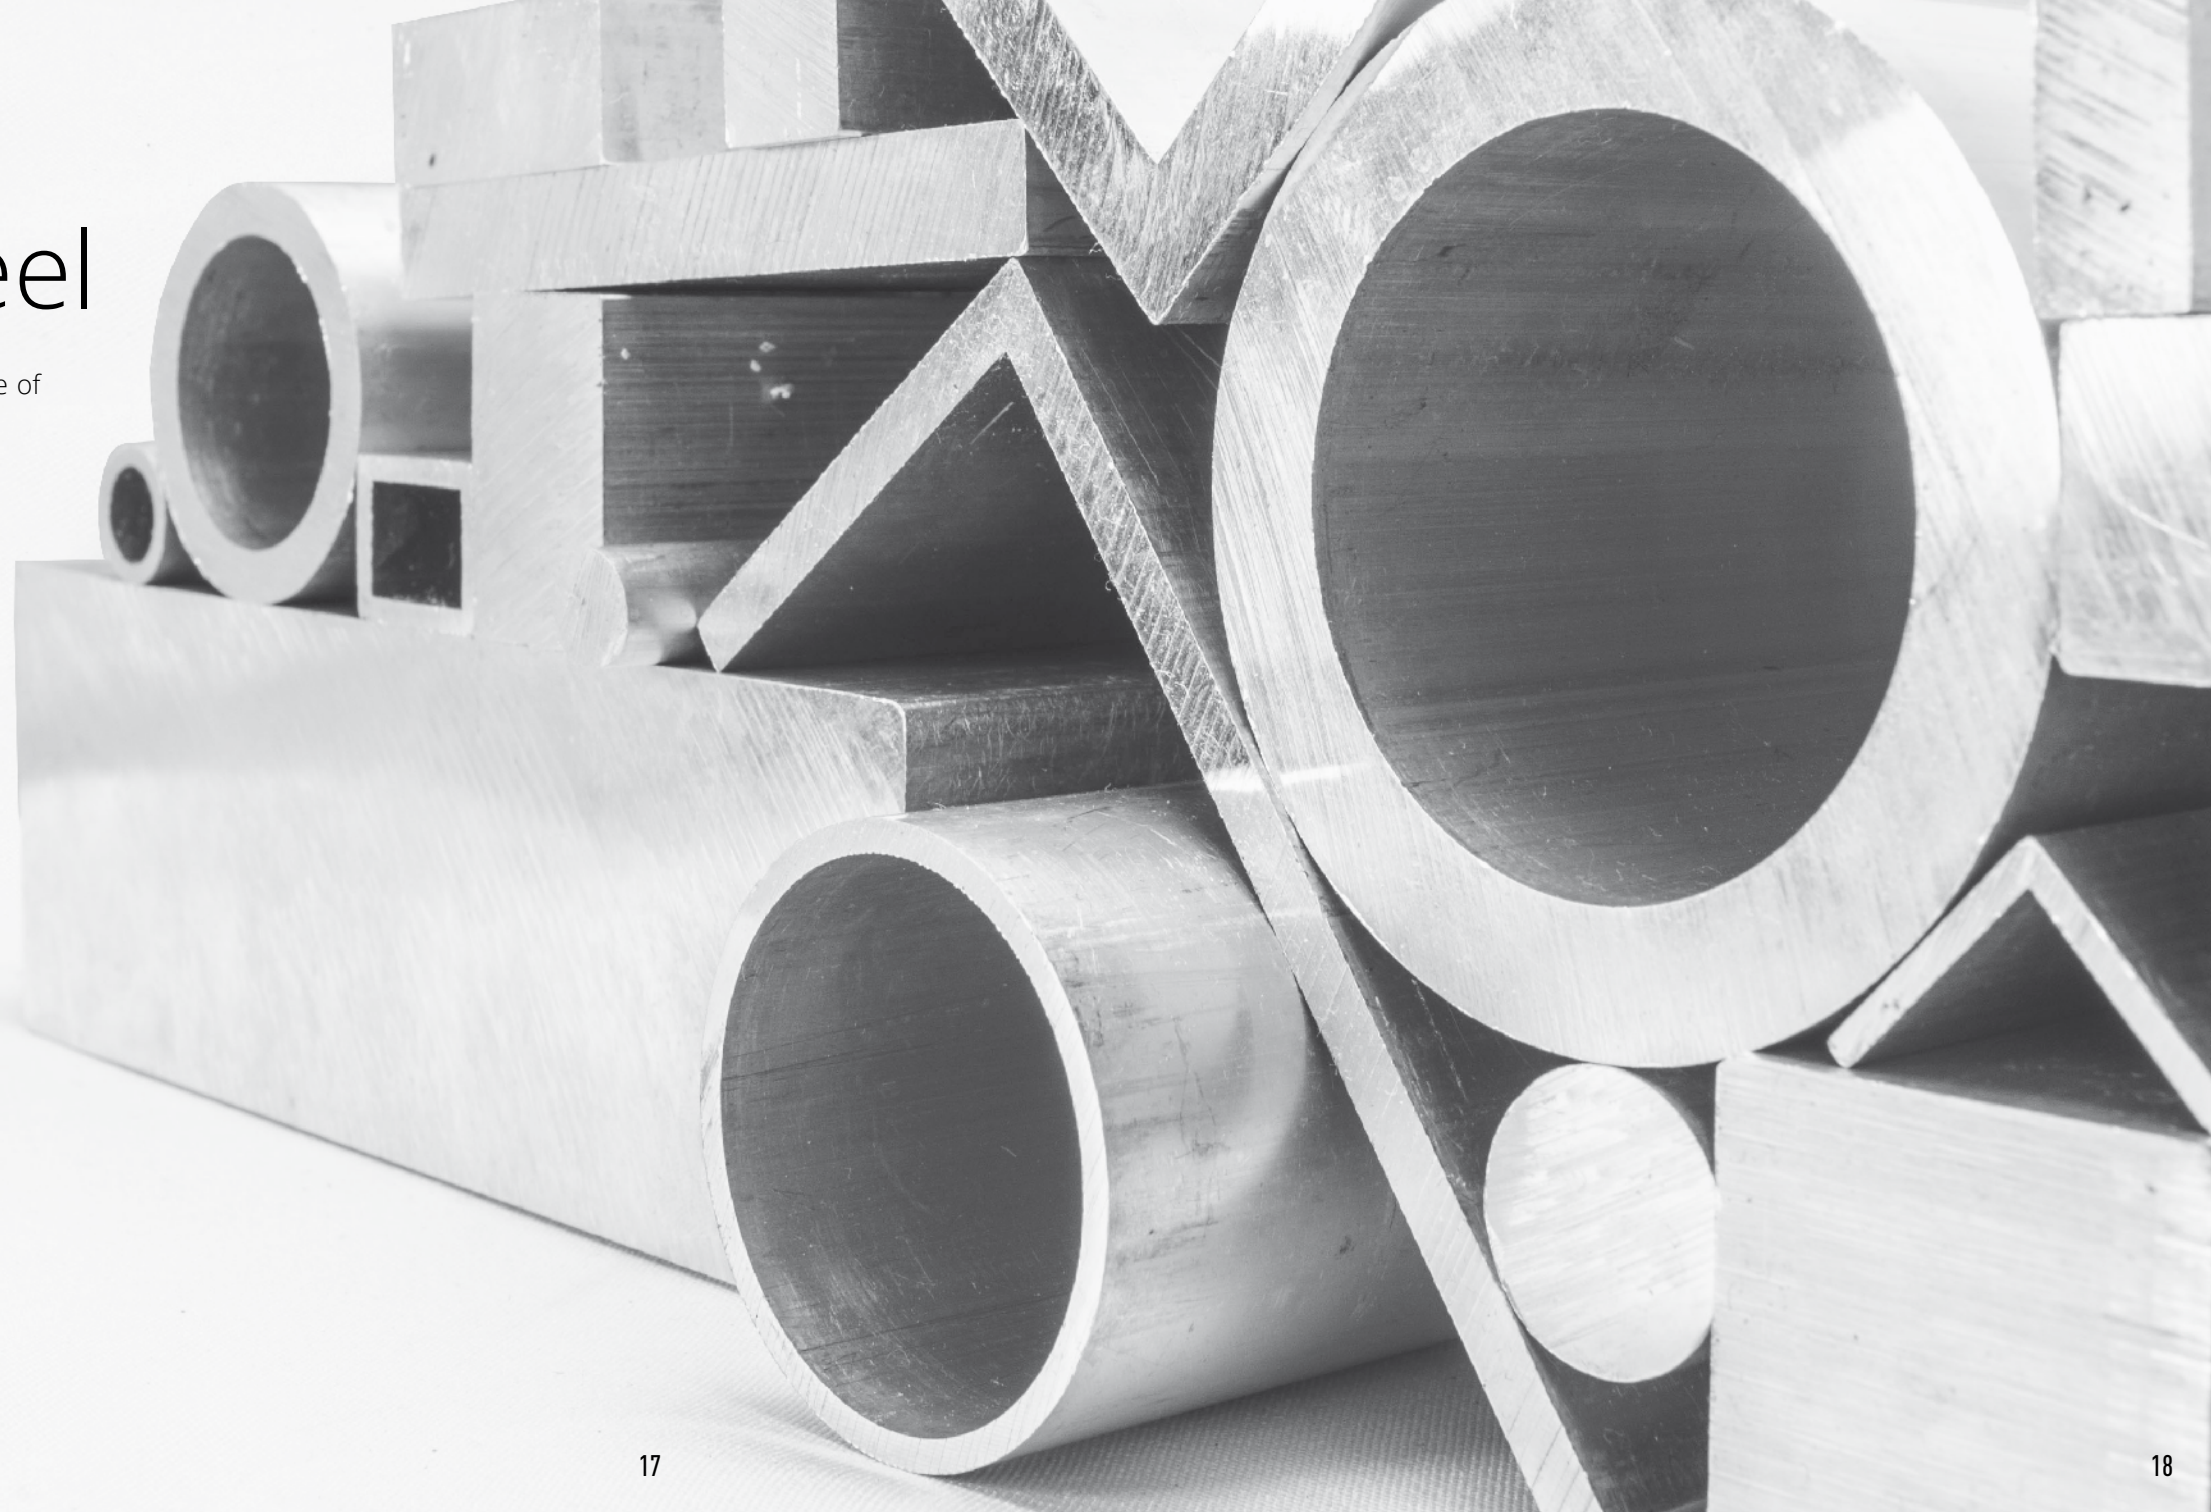

The PicnixX tables are made of extremely durable Cumaru FSC hardwood treated with a special dirt-resistant nano coating. Cumaru wood has a very long life span and in addition it provides a high level of comfort due to its warm and high-quality product characteristics. The Cumaru hardwood is virtually without cracks or splinters. In combination with the supplied protective covers, the lifespan of the hardwood increases to over 25 years. The invisible dirt-resistant nano coating ensures dirt to be easily removable.

# Stainless Steel

The metal frame of the PicnixX products is made of highly durable stainless steel. The same applies to the mounting tubes of the sunshade. These are also made of premium quality stainless steel. It is an awesome material that offers many advantages. Stainless steel is strong and tough. In addition, it is a great advantage that the steel needs less treatment before it is powder coated in a nice RAL colour.

# Indoor

Thanks to the quality and multi-functionality of the PicnixX collection, it does not matter whether it is used outdoors or indoors. The timeless design and the many variations that are possible make the PicnixX collection come into its own in almost every context. This could be in a meeting room, consultation room, or for furnishing an entrance hall. If needed, we adapt the product to fully meet your requirements.

# Landscape

The PicnixX collection is very suitable for outdoor use. The products are extremely durable, vandal proof and have an extremely long service life. They are applicable in a private, business or public space. Due to the many variations that are possible, PicnixX offers a solution for nearly all furnishing requests. A good example of this is the use of the PicnixX collection at the outdoor area of the Princess Maxima Hospital in Utrecht.

# Hospitality

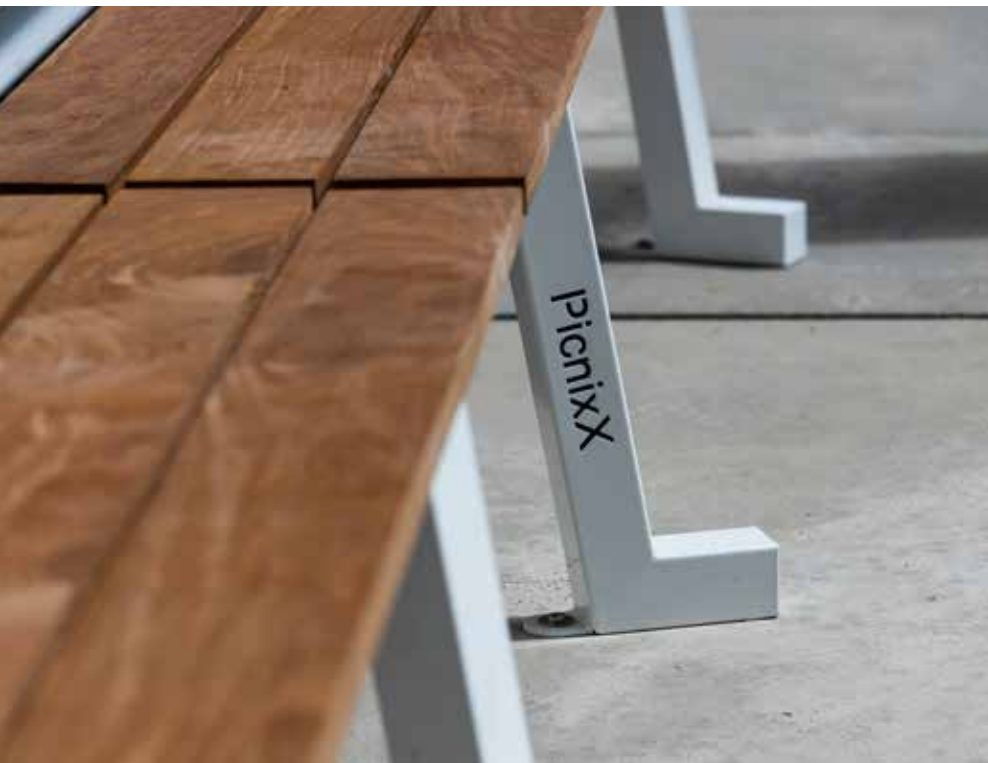

The PicnixX products are inviting, comfortable, durable and therefore ideal for furnishing an indoor or outdoor catering area. Depending on your wishes, we can supply a matching sunshade, set of backs or upholstery. Furthermore, it is possible to treat the wood with a NANO coating or stain, to ensure that 'accidents' affect the wood as little as possible.

# Specials

Our collection as well as our procedure is flexible, which offers nearly infinite possibilities for making adjustments. Nearly everything is possible. Whether this concerns easy, minor adjustments, such as installing electrical outlets or applying a different RAL colour, or customized projects, it is no problem for us. Please contact us and challenge us with your question!

# Options

The basis of PicnixX consists of the stainless steel frame and the Cumaru hardwood boards. At your request, the picnic table can be fitted with a shade cloth, cushion set, protective covers or adjustable feet. For the Mister PicnixX table you can order a set of backs. In the case of the Miss PicnixX, also a bench that offers all round seating is available, to provide the table with even more seating.

# Cushion Set

You have the option to order custom-made, comfortable Sunbrella cushions. These cushions are weatherproof and increase the seating comfort of your PicnixX table even more. You can choose from 3 standard colours. The Sunbrella fabrics are virtually UV-resistant, and water and dirt repellent. The cushion covers are detachable, so they can easily be washed. The filling is comfortable and of high quality.

# Protective Covers

At your request we can supply custom-made dark brown leatherette protective covers. Those are for shielding the seats and tabletop when the PicnixX table is not in use. The protective covers are water and dirt repellent and extend the life span of the PicnixX table. In addition, the covers ensure that the table looks nice when not in use.

## Set of Backs

For the rectangular Mister PicnixX table it is possible to order a set of backs. The back can be clicked in and out of the seat very easily. The matching back provides even more seating comfort, in case, for example, you are enjoying an extensive dinner. Thanks to this handy click system this set of backs may be ordered at a later time as well.

# Sun Shade

The PicnixX concept includes the possibility of a shade cloth above the table. The Sun Shade is very easy to set up or break down. Just insert the stainless steel tubes into the legs of the frame and click the Shade onto the tubes. With the supplied tensioners it is straightforward to stretch the canvas nicely. If required, the stainless steel tubes of the Shade can easily be stored under the frame.
